

[advancing e-mobility]

Drive solutions for the future of e-mobility

Become part of the success story of Morat swoboda

Morat Swoboda is a young, dynamic company that promotes electromobility with innovative drive solutions. To strengthen our creative, cosmopolitan team, we are looking for people who want to take this exciting path with us. For our location in Nowa Ruda, we are looking for a:

[Electro-Mechanik / Mechatronics (all genders)]

Your tasks

- Responsibility for performing machine inspections
- Ongoing electrical and mechanical repairs, removal of failures
- Supervision over the technical infrastructure of the plant
- Supporting machine changeovers
- Participation in launching new production stations
- Preparation of technical documentation
- Verification of technical data and reporting the demand for spare parts
- Participation in machine modernization processes, especially in terms of energy saving

Your profile

- Candidates for the position of electromechanics should have a minimum secondary education (preferably mechanical engineer and machine construction or electrical engineering majors) and have experience in a similar position
- Knowledge of a similar type of machinery and production processes is welcome, so that candidates can quickly adapt to new conditions and implement solutions from other organizations
- The candidate must have the energy entitlements of group 1 „E” and „D”
- The ability to think analytically and to act quickly and effectively in crisis situations is also important
- Communicative use of English and / or German will be an advantage

Interested?

We are looking forward to receive your convincing application documents, including your expected salary and possible date of entry. Please send your application to: a.osicka@morat-swoboda.com

We offer:

-  Medical package
-  Group Insurance
-  Training and Courses
